

Name of activity: Exploding Lava Science Bottle

<https://parentingchaos.com/exploding-lava-science-bottle/>

Materials

- Clear Water Bottle
- Cooking oil
- Water
- Food Coloring
- Alka-Seltzer (or any other antacid)
- Large plastic tub or plastic table cloth

Instructions

1. Fill the clear bottle 1/4 of the way up with water. Add in a couple drops of food dye and mix together.
2. Top with cooking oil and open a couple packets of antacids.
3. Then let kids add the tablets to the bottle and watch it fizz up and explode!
